Project: Marketing Agency

Technologies: HTML, CSS, JavaScript, PHP

Developed a fully-functional website for a digital marketing agency aimed at enhancing online presence and client engagement. Leveraged HTML and CSS for structured content and responsive design, ensuring optimal user experience across various devices. Implemented interactive elements using JavaScript to facilitate dynamic content updates and user interactions. Utilized PHP for backend development, enabling robust server-side capabilities such as form submissions and content management. The project showcases a blend of front-end and back-end development skills, contributing effectively to digital marketing strategies.

Project: Webflow Portfolio

Platform: Webflow

Executed a comprehensive website design using Webflow, focusing on high aesthetic quality and user engagement. Utilized Webflow's visual development interface to create custom layouts and interactions without writing extensive code, enhancing design efficiency and speed. Integrated animations and visual effects to provide a dynamic user experience, driving user interaction and retention. The project demonstrated strong design principles coupled with effective use of Webflow's CMS for scalable content management and SEO optimizations, significantly boosting the site's visibility and performance. Developed a fully-functional website for a digital marketing agency aimed at enhancing online presence and client engagement.

EXTRA - CURRICULAR ACTIVITIES

GOOGLE Developers Students Club

BOOTCAMP SUPERVISER

- *Mentors students, and ensures the effective delivery of the program, fostering skill development and practical understanding of user interface and user experience design principles.*

Microsoft Club Essths

UI/UX Trainer

- *Leveraging expertise in wireframing, sketching, and layout to enrich students' learning experiences. They meticulously develop curriculum content, infusing theoretical knowledge with practical skills honed through their proficiency in these design elements.*
